The COMPLETE X-Twin DIY Aero System range

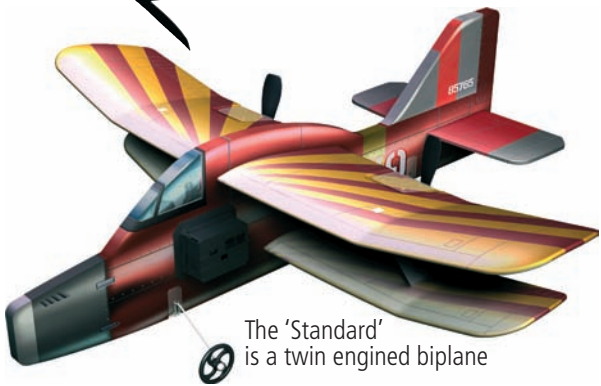

Read the review on the amazing Silverlit® R/C X-Twin™ DIY Aero System models from Flying Toys in this issue then take the chance to lay your hands on not one or two, but the WHOLE set of five of these miniature marvels. Second place will receive the Professional kit and third prize is the Advanced version. Regular readers know how much fun these mini R/C models are from John Stennard's Light Flight column, especially indoors on a cold winter flying night! They have great appeal for experienced flyers and youngsters and are a great introduction to R/C flying.

They fly on Bands A, B and C on 27 MHz, so three can be in the air at once. All you have to do for a chance to own a COMPLETE SET of five is answer our simple question and send your answer to us complete with the short tie-break slogan and you could be among the happy band of RCMW winners.

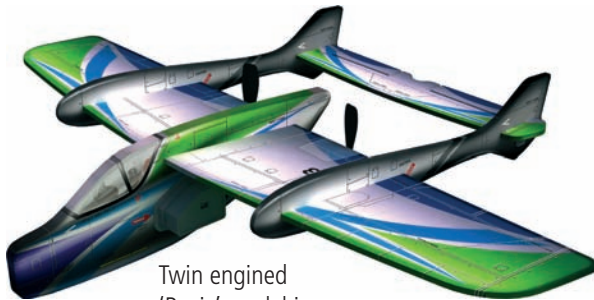

Question:
How many X-Twin models can be flown at the same time?

The orange version of the 'Easy' set

The 'Standard' is a twin engine biplane

Twin engine 'Basic' model in green

The jet-like 'Advanced' version has propellers in wing slots

The 'Professional' is a powerful four engine model

ENTRY FORM

To enter, please complete and return the competition entry form below by the closing date of 17/12/08. The winning entry will be drawn after 17/12/08 and will be published in a future issue of RCMW.

The answer is:

Tiebreak: Indoor flying appeals to me because... (In no more than 20 words)
